RE: 3809 (U-010) UTU-075870

Dear Mr. Rowley:

Yes, I wish to extend my notice UTU-075870. Enclosed find copy of the estimate originally provided to your office in 1998 covering reclamation of the original discovery cut near the north end and the "Pink Pit" near the south end of the claim. These were created under the original claimant Mr. Howard C. Bachman. I have been back filling by hand the Pink Pit, originally 15 feet deep and 465 square feet in area except for the SW corner and the west side where I may work in the future. Some of the piles created under Mr. Bachman have been naturally overgrown should these be disturbed to lower their 3' height? Much of the broken rock around the pit will be tossed into the pit to bring it to grade. The original discovery cut 43 feet long by 10 feet wide and up to 6 feet deep has been refilled and about 300 square feet has been covered with soil, as of October of last year, spreading native seed hasn't been very productive due to the dry conditions. Current operations have been conducted into the solid rock knob just south of the original discovery, have resulted in a pit into the knob of about 350 square feet and a 225 square feet pile on the east side.

Over time considerable trash left by hunters, mineral collectors and sheep herders has been removed with the exception of the remains of a wooden cask likely left by a sheep herd more than 50 years ago hence considered of archaeological significance. I am submitting a \$500.00 cash bond.

Encl:

William Chirnside
